

SOLARMONKEY ADVENTURER SLIMLINE SOLAR POWERED CHARGER WITH INTEGRATED BATTERY

3500mAh

if **you can**
dream it
we can power it

The solarmonkey adventurer is a slimline, compact 2-panel solar charger with a 3500mAh internal lithium polymer battery. The clamshell design offers optimum weight-to-efficiency at just 265g and the 2 solar panels output 3 watt max. The adventurer features auto-load, self sensing switching technology, meaning when a device is connected, the adventurer will automatically start to charge your device and will optimise the charging parameters required.

YOU CAN CHARGE:

KIT INCLUDES:

solarmonkey adventurer portable charger
Carabiner
Protective storage case
Female Dc to micro USB tip
USB DC connection cable

TECHNICAL SPECIFICATIONS:

3500 mAh internal battery (12.95Wh)
Input: solar and DC 5V 600mA
Solar panel output: USB port: 5V 600mA
Internal battery: 5V 2A
Weight: 265g (unit only)
Dimensions when folded: 170 x 96 x 22.75mm
with 2mm safety gap between solar panels

FEATURES:

Water and shock resistant
MPPT solar technology
Colour changing LED to denote level of charge
Auto-load, self-sensing, charge optimisation technology
4-colour LED shows level of charge:
Red - 25%
Yellow - 50%
Green - 75%
Blue - 100%

Part Code: SMA-U-003
Ean Code: 5060 1769 8426 4
Carton Qty: 18
Carton Weight: 13kg
